RESEARCH INTERESTS

Deep Learning, Computer Vision, Human-Computer Interaction, VR/AR

EDUCATION

University of Electronic Science and Technology of China (UESTC), China

MS, Computer Science, and Technology — August 2016 – July 2018

Research Area: Image Recognition and captioning using DL — GPA: 3.71 (4.0 scale)

Islamia University of Bahawalpur (IUB), Pakistan

BS, Computer Science GPA: 3.11 (4.0 scale) — October 2010 – August 2014

EXPERIENCE

Research Assistant - Embedded Software Engineering Center, China — September 2016 – Present

Working on image recognition for images and videos based data using machine learning techniques like Deep learning and Deep Neural Networks.

Unity3D Game Developer - Vexxor Technology, Pakistan — January 2015 – August 2016

As a game programmer for creating 2D and 3D Mobile Games.

Android Developer Intern - DreamWork Technology, Pakistan — May 2014 – December 2014

Application development and game development.

TECHNICAL SKILLS

Programming Languages	Python, C++, Java, C#
Software	Tensorflow, Caffe, Keras, PyCharm, Visual studio, Unity 3d, OpenCV, Git
Hardware	GPU, Distribute Computing, Sensors (beginning level)
OS	Linux, Windows, Android

HONORS AND AWARDS

Chinese Government Scholar - China Scholarship Council (CSC) — September 2016

Attending University of Electronic Science and Technology on a Ministry of Education Scholarship as a graduate student in the School of Computer Science and Engineering.

PEEF Merit Scholar - PUNJAB EDUCATIONAL ENDOWMENT FUND (PEEF) — October 2010

I studied on PEEF Scholarship for four years during my Undergraduate Study at the Islamia University of Bahawalpur in Pakistan.

PROJECTS and HACKATHON

Scene Recognition — **Tools:** Tensorflow, Python, Cloud System

- Took part in AI Challenger Competition more detail on my GitHub page

Recognition System For People Of Interest In Visual Data — **Tools:** Tensorflow, Python, AWS Cloud

Image Captioning — **Tools:** Keras, Tensorflow, Python, AWS

- working on project to create image description for bilingual captions (English and Chinese)

Student OS — **Tools:** C#, MS Vs, Algorithm Simulation

- created operating system simulation system for student to understand CPU scheduling

VR ready mobile game (Global Game Jam) — **Tools:** C#, Unity3d, Android

- Recently took part in Global Game Jam and created VR game.
- My role was a game programmer in our team.
